PROFESSIONAL SUMMARY

I am an AI-assisted Software Developer and Web3-focused builder with experience designing and developing decentralized AI-powered digital products. Skilled in front-end and full-stack web development using HTML, CSS, JavaScript, Flutter, and modern AI coding workflows (Claude, ChatGPT, AI Studio). Experienced in building early-stage Web3 and blockchain-inspired systems, including fintech, decentralized ideas, and AI-integrated applications. Passionate about contributing to the decentralized economy through scalable, transparent, and user-focused digital solutions.

CORE SKILLS

- Web Development (HTML, CSS, JavaScript)
 - Front-End & UI Development
 - AI-Assisted Development (Claude Code, ChatGPT, AI tools)
 - Web3 Concepts (Blockchain applications, DeFi awareness)
 - Flutter & Mobile App Development
 - API Integration & Backend Basics (Node.js, Firebase, Supabase)
 - UI/UX Design (Figma, responsive design)
 - Git & Version Control
 - Problem Solving & System Thinking
 - Remote Collaboration & Agile Workflows
-

WEB3 / AI PROJECT EXPERIENCE

Web3 & AI Product Builder (Independent)

Remote | 2023 – Present

- Built experimental Web3-inspired and AI-powered digital products using modern web technologies
 - Applied AI coding tools to accelerate development, debugging, and UI generation workflows
 - Designed early-stage concepts for decentralized and fintech-style applications
 - Focused on user experience, scalability, and clean interface design across web and mobile platforms
-

Selected Projects

SnappyX (Web3 E-Commerce & Auction Concept)

- Designed conceptual architecture for a blockchain-based marketplace and auction system
- Explored decentralized transaction flows and trustless exchange models
- Built UI prototypes and user flow structures for digital asset trading experiences

PropAlty.io – AI Property Matching Platform

- Designed UI concepts and product flows for an AI-powered property recommendation platform
- Created onboarding screens, property detail layouts, and conversational UI concepts

TerraChain AI (AI + Blockchain Concept)

- Developed concept for an AI-assisted land registry and verification system
- Designed workflow for secure record validation using blockchain-inspired logic
- Created interface prototypes for the land record search and verification system

KudiTrack (Fintech + Automation Project)

- Built a WhatsApp-based financial tracking system for SMEs
 - Designed automation workflows for transaction recording and reporting
 - Integrated AI-assisted structuring for user financial summaries
-

TECHNICAL SKILLS

- HTML5 / CSS3 / JavaScript
- Flutter (Mobile & Web)
- Node.js (Basic Backend Development)
- Firebase / Supabase (Basic)

- REST API Integration
 - Figma (Wireframing & Prototyping)
 - Git & GitHub
 - AI Tools: Claude Code, ChatGPT, Google AI Studio
-

EDUCATION

B.Sc. Accountancy
University of Abuja, Nigeria

Postgraduate Diploma, Accounting & Finance, Nigerian College of Accountancy, Jos

ADDITIONAL STRENGTHS

- Strong interest in Web3 ecosystems (DeFi, blockchain apps, decentralized systems)
 - Fast learner in emerging technologies and AI tools
 - Strong analytical thinking and structured problem-solving
 - Ability to work independently in remote, global teams
 - Passion for building scalable digital products in the AI and Web3 space
-
